Miles of tiles & the  
smell of design

**Kohler | Memoirs Collection**

Launched in 1997, Kohler's Memoirs Collection has long been prized for its simplicity. The collection – featuring faucets, showers, bidets, cabinetry, sinks, toilets and accessories – still stands the test of time 21 years later. Combining clean, crisp edges with rounded details, the Memoirs Collection perfectly echoes the stylized lines of historically renowned furniture and architectural design.

**Kohler | Sartorial Collection**

Paying tribute to the refined elegance of 19th century European Paisley and Herringbone patterns, Kohler's Sartorial Collection sinks are at once timeless and tactile. The geometric Herringbone motif of dots and dashes adds texture and structure, while the Indian teardrop Paisley pattern plays on femininity and flair. The vitreous china and fireclay sinks are available in round or rectangular options.

# Rub-a-dub-dub

*From ergonomic bathtubs to Wi-Fi connected showers, the washroom is quickly becoming the most favoured room in the house. These products make the morning routine a little more bearable, and the lavatory a lot more stylish.*

**Valdama | Cameo Collection**

Designed by Prospero Rasulo for Valdama, the Cameo washbasin collection plays on simple forms of geometry in an effort to create familiar yet impactful volumes. The wall or console-mounted sinks are made of fine fireclay, and are characterized primarily by their raised, slim perimeter rim. Best of all: the overflow outlets have been integrated into the rear of each washbasin, hiding them from view. [www.valdama.it](http://www.valdama.it)

**Salvatori + Fantini | Fontane Bianche**

Designed by Elisa Ossino and marking Fantini's first collaboration with Salvatori, the Fontane Bianche collection stylishly fuses the passions of each company: water and stone. The collection features washbasins and faucets inspired by the geometry of the circle and square, reimagined in a contemporary context. The washbasins are available in marble and stone, with the faucets offered in a unique matte gunmetal finish. [www.fantiniusa.com](http://www.fantiniusa.com)

**Wetstyle | IMAGE-in motifs**

Purposefully breaking away from the modern minimalist trend, Wetstyle's new IMAGE-in motifs opt for patterns and texture instead. This collection of four tone-on-tone motifs can be applied directly to a bathtub's exterior surface, turning an often understated fixture into the focal point of the room. From the illusion of a wave to the expressive rhythm of calligraphy, these adhesive motifs are at once fun and forward-thinking in the vein of bathroom design. **Co.Studio | Andrew**

Winner of a 2017 European Product Design Award, Co.Studio's Andrew faucet aims to capture the essence of water through its pure and minimalist form. Available in brass, chrome, nickel and bronze with optional matte and colour finishes, the faucets and taps are perfectly simple and stripped down, adding style to any bathroom in wall-mounted or surface form.
